

Appl. No. 10/085,86
Amdt. dated April 26, 2004
Reply to Office Action of Jan. 30, 2004

Amendments to the Specification:

Please replace the paragraph/sentence at page 7, line 21 with the following amended paragraph/sentence:

b The e-mail server 1312 stores this e-mail in it's memory.

Please replace paragraph at page 8, lines 1-5 with the following amended paragraph:

b2 After the HTTP get message is generated, it is sent to the gateway 18 via the mobile network 15. Then the gateway 18 sends this message to the protocol translator 14. Then the protocol translator 14 translates this HTTP get message into a POP request to the e-mail server 12. POP is the Post Office Protocol which is supported by the e-mail server 12.

Please replace paragraph at page 8, lines 12-16 with the following amended paragraph:

b3 The protocol translator 14, after having received the e-mail via the POP protocol, translates the received e-mail into a HTTP reply message. Such a HTTP reply message is known to persons skilled in the art and is used to transmit web pages from a web server to a client. The HTTP reply message is transmitted to the gateway 18 that forwards the HTTP reply message to the mobile device 17(i).
